

iQuip

INTELLIGENT EQUIPMENT

iQuip is the official partner and distributor for the full range of Demmeler equipment for the South African and African markets. Demmeler is the manufacturer of THE ORIGINAL Modular Welding table system for steel construction, sheet metal processing, robotic technology, assembly and measuring applications.

Modular fixturing refers to a set of adaptable and interchangeable tooling components and tables that allow you to assemble and modify a normally fixed jiggling system. This system then enables the user to create any jig, with the peace of mind that the components and tables are accurate and reliable. Demmeler Modular Welding table systems can be installed for steel construction, sheet metal processing, robotic technology, assembly and measuring applications.
